RM7766-2HD 7" Smart Wi-Fi 1080p

RM7766HD

For more support information

Congratulations

on purchasing your new VTech product. Before using this baby monitor, please read the Important safety instructions For support, shopping, and everything new at VTech, visit our website at www.vtechphones.com. In Canada, visit www.vtechcanada.com.

hat does HD Video Monitor do?

VTech 7" Smart Wi-Fi 1080p Pan & Tilt Monitor allows you to stay close to your baby when you are on the move or away. This monitor is Wi-Fi enabled, using your home wireless network to stream live video and audio through the 1080p baby unit and 7-inch color screen parent unit. It allows you to maintain a constant connection to your baby.

You can also monitor from your smartphone and mobile tablet. VTech 7" Smart Wi-Fi 1080p Pan & Tilt Monitor uses MyVTech Baby Pro app to let you instantly see and hear what's happening with your baby from anywhere in the world. The app can be downloaded from the App Store or the Google PlayTM Store.

WHAT'S IN THE BOX

1 set for RM7766HD

2 sets for RM7766-2HD

For mobile access:

MyVTech Baby Pro mobile app	
-----------------------------	--

Network	Wi-Fi
Wi-Fi router	2.4GHz 802.11 b/g/n
Internet connection	1.5 Mbps @ 720p or 2.5 Mbps @1080p upload bandwidth per baby unit

DOWNLOAD APP FOR MOBILE ACCESS

Download the free **MyVTech Baby Pro** mobile app and install it to a mobile device, then use your mobile device and the mobile app to monitor your areas remotely.

1. Press **MENU** when the parent unit is idle.

2. Go to Connect Mobile Phone

Install MyVTech Baby Pro mobile app

3. Scan the QR code in the parent unit to download the app into your mobile device.

4. Follow the instructions in the mobile app to set up and pair your baby unit to the mobile app. Alternatively, you can download the mobile app from the App Store or

Google Play store.

- 1. Browse the App Store 🙆 or the Google Play store 🝺
- 2. Search for the mobile app with the keyword "myvtech baby pro".
- 3. Download and install the MyVTech Baby Pro mobile app to your mobile device.

Download on the App Store Google Play

Scan the QR codes on the right to get the app.

 Make sure your mobile device meets the minimum requirement for the mobile app.

Minimum requirement

- The mobile app is compatible with: Android[™] 6.0 or later; and
- iOS 12 or later.

After installing the mobile app, follow the instructions in the mobile app and parent unit to set up and pair your baby unit.

In your mobile device:

- 1. Tap to run the mobile app in your mobile device, and then create a user account.
- 2. We recommend that you use common webmail services, such as Google Gmail for registration of your user account. Check your email (and Spam folder), and activate your new camera account via the email link, then sign in to your account.

CONNECT, CHARGE AND POWER ON THE BABY MONITOR

3. Follow the instructions in the mobile app to pair the camera. Tap =, then Add Camera in the mobile app to get started.

PROTECT YOUR PRIVACY AND ONLINE SECURITY

VTech cares about your privacy and peace of mind. That's why we've put together a list of industry-recommended best practices to help keep your wireless connection private and your devices protected when online. We recommend you carefully review and consider complying with the following tips.

Ensure your wireless connection is secure.

- Before installing a device, ensure your router's wireless signal is encrypted by selecting the "WPA2-PSK with AES" setting in your router's wireless security menu. Change default settings.
- Change your wireless router's default wireless network name (SSID) to something unique. • Change default passwords to unique, strong passwords. A strong password:
- Is at least 10 characters long. Is complex.
- Does not contain dictionary words or personal information.
- Contains a mix of uppercase letters, lowercase letters, special characters and numbers. Keep your devices up to date.
- will ensure you always have the latest security updates.
- If the feature is available, enable automatic updates for future releases. Disable Universal Plug and Play (UPnP) on your router.
- network devices to open inbound ports without any intervention or approval from you. A virus or other malware program could use this function to compromise security for the

Connect the baby monitor

■ Notes

- · The rechargeable battery in the parent unit is built-in Use only the power adapters supplied with this product.
- Make sure the parent unit and the baby unit are not connected to the switch controlled electric outlets. • Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are not

Make sure the parent unit, the baby unit and the power adapter cords are out of reach of children.

designed to hold the weight of the parent unit and the baby unit, so do not connect them to any ceiling, under-the-table, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.

Slide the switch to **ON** to power on your baby unit.

 When powering up, the baby unit's status LED turns on. It will turn off after a while and keeps off. The status LED is set to off by default. If you want to

keep the LED on, press **MENU**, then go to

> Status LED and turn it on.

Charge the parent unit battery before use

The parent unit runs on rechargeable battery or AC power. To continuously monitor your baby, keep the parent unit connected to AC power.

- · Before using the baby monitor for the first time, charge the parent unit battery for 12 hours. When the parent unit battery is fully charged, the battery icon becomes solid [[[[[]]]].
- The standby time varies depending on your actual use.

After the parent unit is fully charged, press $oldsymbol{ ext{O}}$ Power until the welcoming screen appears

The battery icon indicates the battery status (see the following table).

The screen displays and LED light flashes.	The battery has very little charge and may be used for only a short time.	Charge without interruption (about 30 minutes).

① CAUTION

not be used as such.

Keep the baby unit out of the reach of your baby. Never place or mount the baby unit inside the baby's crib or playpen.

· This baby monitor is intended as an aid. It is not a substitute for proper adult supervision, and should

For hearing protection, make sure the parent unit is more than 3 feet away from the baby

unit. If you hear any high-pitched noise from the parent unit, move the parent unit further

until the noise stops. You can also press **VOL** – on the parent unit to lower or mute the noise.

Increase the parent unit speaker volume if you cannot hear the sounds transmitted from the baby unit.

1. Place the baby unit more than 3 feet away 2. Adjust the angle of the baby unit to aim from your baby.

at your baby.

Test the sound level and position the baby monitor

3. To avoid causing high-pitched screeching noise from your baby monitor

- Make sure your baby unit and parent unit are more than 3 feet apart; OR
- Turn down the volume of your parent unit.

TEST THE LOCATION FOR THE BABY UNIT

If you plan to install your baby unit in a designated location, and use your home Wi-Fi network to connect your video monitor, you need to test which of your selected monitoring areas within the house have good Wi-Fi signal strength. After you have powered on your parent unit, you can use your parent unit's Wi-Fi signal strength indicator to assist in checking. Once you have identified the suitable location, you can install your baby unit. Adjust the distance between your baby unit and the Wi-Fi router if needed.

Depending on surroundings and obstructing factors, such as the effect distance and internal walls have on signal strength, you may experience reduced Wi-Fi signal. To improve the Wi-Fi signal strength, adjust the distance or direction of your parent unit. Check with

AUTO SOFTWARE AND FIRMWARE UPDATE

To ensure that your baby monitor is always at its best performance, the parent unit will prompt you to update its software and the baby unit firmware when there are new versions available.

- Follow the instructions on the parent unit screen to update your baby monitor. If you skip the updates, the parent unit and baby unit will be updated automatically when the parent unit is powered off, and then powered on again.
- To check if your device is running on the latest software or to update your device software, go to

You must connect your video monitor to your secured home Wi-Fi network in order to receive the latest software and firmware updates. To set it up, go to:
